Recommended preparation

BI 121.

Course Description

Covers the nervous system, eyes, ears, reproduction, genetics, digestion, urinary system, hormones and diabetes. Designed for pharmacy technician, medical assisting and massage therapy programs. Lecture and lab are taken simultaneously; not offered as separate classes. Preserved animal tissues are used in some labs.

Course learning outcomes

1. Demonstrate a fundamental understanding of human anatomy and physiology with an emphasis on nervous, sensory, reproductive, digestive, urinary and endocrine systems.
2. Demonstrate an understanding of relationships within and between organ systems.
3. Develop a continuing curiosity about the human body, and an ability to apply scientific tools to lifelong exploration and learning.
4. Make connections between anatomy and physiology knowledge and diseases.
